

## FOR IMMEDIATE RELEASE

### New Website Launches to Enhance Driver Education and Safety Resources

Martinsburg, West Virginia – April 7, 2025 – A comprehensive new online resource, <https://drivereducators.org/> has launched to provide invaluable tools and information for driver educators, students, and the general public. This website aims to improve driver safety by offering a centralized hub for best practices, educational materials, and collaborative resources. This protects not only the driving public but the first responders who assist them on the roadway.

The website addresses the critical need for up-to-date driver education in an increasingly complex driving environment. It features a wide range of resources, including:

- **Curriculum Development Tools:** Resources to assist educators in developing effective and engaging driver education programs.
- **Safety Best Practices:** Information on the latest safety standards and techniques, including distracted driving prevention, impaired driving awareness, and advanced driving skills.
- **Student Resources:** Interactive materials, practice tests, and guides to help students prepare for and excel in their driver education.
- **Professional Development:** Opportunities for driver educators to enhance their skills and stay current with industry trends.
- **Legislative Updates:** Information on relevant traffic laws and regulations.

A key feature of drivereducators.org is its strategic partnerships, which amplify its impact and reach. Notably, the website has forged collaborations with:

- **Emergency Responder Safety Institute (ERSI), a sub-committee of Cumberland Valley Volunteer Firefighters Association:** This partnership brings critical insights into emergency scene safety, ensuring that driver education programs emphasize the importance of protecting first responders. Resources provided by ERSI will help educators train new drivers on how to navigate and respond safely around emergency vehicles and incidents.
- **American Driver and Traffic Safety Education Association (ADTSEA):** This collaboration strengthens the website's foundation with ADTSEA's extensive network and expertise in driver education. ADTSEA's involvement ensures that the resources available on drivereducators.org align with the highest professional standards.

“We are thrilled to launch drivereducators.org, a platform that will significantly contribute to safer roadways,” said Greg Yost, Chairman of the Driver Educators Task Force for the Emergency Responder Safety Institute. “By partnering with ERSI and ADTSEA, we are able to provide a robust and comprehensive resource that addresses the multifaceted challenges of driver education.”

Yost, added, “Our collaboration with drivereducators.org allows us to extend our reach and educate new drivers on the importance of emergency scene safety. This partnership is vital for

protecting both first responders and the public. We are very happy to be a part of this important project.”

"ADTSEA supports the Cumberland Valley Volunteer Firefighters Association to enhance first responder safety through their launching of the drivereducators.org website. This website will be an invaluable tool for ADTSEA members and the broader traffic safety community to learn more about first responder safety," said Brett Robinson, Executive Director of ADTSEA.

Visit [www.drivereducators.org](http://www.drivereducators.org) to explore the resources and learn more about the partnerships.
